REYCO

REYCO is an international company in the renewable energy and electrical infrastructure sector. We offer you comprehensive solutions in the installation, maintenance and engineering sectors of wind farms and photovoltaic parks. Likewise, we are experts in the design and installation of electrical infrastructure. For us, distance does not prevent us from providing excellence in our service to each of our clients.

***"Our priority,
the safety of
our people"***

How do we do it?

For us, our priority is the safety of our employees. Therefore, we have a solid foundation that allows us to accomplish any type of challenge:

- Experience has allowed us to develop protocols that achieve the most demanding international and national standards.
- Top brand components and tools.
- Training and continuous improvement of our employees.
- Certified Quality.
- ERP to improve internal and external processes. We can trace up thousands of coded pieces.

C/ Niza 77 Piso 7 Col. Juárez
Alcaldía Cuauhtémoc, CdMx 06600, México.

What do we do?

PROJECT SOLUTIONS AND TECHNICAL SUPPORT

- Installation
- Disassembly and dismantling
- O&M Services
- Preventive Maintenance
- Corrective Maintenance
- Commissioning
- Civil Engineering
- Audit and Specialized consulting
- Waste Management
- Energy Efficiency
- Facilities Supply
- Hydraulic and Manual Tools Supply

INSTALLATION

- Wind Farms
- Solar Parks
- Electrical and Mechanical wind turbines
- Trackers and solar panels
- Solar Thermal Systems

SUPPLIES

- Cranes, transport and machinery for our projects
- MET Tower
- Solar Panels
- Solar Thermal Equipment

What do we do?

SUPERVISION

- Electromechanical assembly
- Assembly of MET towers
- Quality of transport, logistics and Stock keeper
- Solar Panel Assemblys

MANAGEMENT

- Crane operation for optimal performance
- Quality in the project construction
- NCR
- Subcontractors
- Receipt of materials and logistics
- Certifications and permits
- Facilities

MAINTENANCES

- Scheduled
- General
- Preventive
- MET towers

PREVENTIVE AND CORRECTIVE MAINTENANCE

- Torque and tension check
- Oil change in gearboxes and geared motors
- Large Correctives: Blades, gearboxes, power generators, nacelles.
- Predictive Maintenance with the use of thermographs, vibration analysis and videoscopes

Our Experience

MÉXICO:

- Tres Mesas III
- Reynosa I y V
- Los Altos
- Vicente Guerrero
- Tizimin
- La Amistad
- 2 Arbolitos
- El Porvenir
- El Retiro
- La Mesa
- Le Ventosa III
- Peñasco II
- Piedra Larga I
- Puerto Peñasco
